a. Financial Requirements Policy

MOTION CPR 2014-10-06:04

Potvin

~~Be it resolved to recommend to Board to create the Financial Requirements Policy as presented~~

Khan entered 2:34pm

At present, only a single policy for macro financial matters for the Society existed. The auditors have requested a comprehensive financial policy be developed for the organization. The draft policy presented to the committee consisted of three points: the contents of AP-7.5 speaking to operating equity (AP-7.5 would be transferred to the new proposal), limits on cash to expense towards operating expenditures (avoiding any cash depletion issues), and a mandate of financial analysis (via cashflow statement) to ensure sufficient liquidity for Society operations as per scheduled expenditures.

The Vice President Finance was currently developing an investment policy. Inclusion of references to the Society's investment policy within the draft policy was identified as an issue until such a policy already existed. Further, the motion did not refer to a deletion of AP-7.5

The Committee requested written documentation of the auditor's review (auditors only identify potential issues and do not actively provide approval), as well as a letter from the Staff Liaison Officer indicating that the Finance Office could handle any additional workload that may ensue from this policy.

A consolidated recommendation, coming from a total review of Society financials, were requested to create a fully coherent set of policies which covered the gamut of financial practices and reporting/requisition mechanisms across the organizations (with a particular goal of ensuring that the processes and their interactions with committees and board/staff were understandable by the layman). Policies (whether singular or multiple) could be created to serve the full vision of the Vice President Finance of Society finances and consolidate all financial policies.

6. Discussion

a. Science Undergraduate Society Constitution and Bylaws

One of the FARM goals for the year was to pursue the establishment of FSUs. Copyproofing issues were identified for the benefit of the committee. Discussions ensued around the approval of the constitution from the students within the Faculty of Science. Clarity was sought around the requirements of approval at an AGM, particularly when the SUS does not yet exist can thus could not hold an AGM. The committee had consensus that the approval of the Science DSUs constituted sufficient approval to fulfill this purpose.

Science DSUs have brought in a number of concerns and recommendations during the development of the document, including whether FSUs were the proper channels of representation (given the varying sizes of DSUs with Sciences). The Science Representative prepared the document based upon the recommendations of the DSUs, and has requested motions of support. It was desired for the document to establish an FSU which provides the Faculty of Sciences with a lynchpin for collaboration and large-scale event planning. Potential Faculty Student Union levies were identified as a potential area of great concern, as there was a desire for SFSS members to avoid paying multiple FSU levies. The SFSS may choose to potentially shift the definition of faculty membership to match those of SFU (as identified within academic transcripts) for greater administrative cohesion. As the university collects the funds on behalf of the student society, administration may be difficult under the current model of faculty membership. However, there issues were identified of the ability of SUS to represent and provide services to students intending to transfer into the faculty.

Context of the FSU membership systems reviewed by CPR in 2010-2011 was provided, including the full/associate/honorary system (Society of Arts and Social Sciences) and associate-to-full membership via fee payment system (Faculty of Applied Sciences Student Union).

A number of clubs with Science mandates would be represented by the respective DSUs. It was projected that clubs such as SCI Crew, which organize events that fall under the mandate of the FSUs, would integrate into a new SUS.

An opportunity was presented for SUS to place a moratorium on pursuing levy for 5 years such that the organization is given time to develop. However, should an ambitious FSU executive enter the SUS, they could change the bylaws to allow for the pursuit of a levy, thus negating the effects of such a moratorium.

The Sciences Representative was recommended to speak to the CRP Coordinator, the Student Union Organiser, and the Sciences membership. It was requested that DSU approval be sought prior to CPR review and recommendation to Board.

Identified Constitutional Issues

- 1a – too wordy. It was recommended to avoid excessive repetition of SFSS
- 1c – rewrite the term for simplicity.
- 1d – language changes to ensure that the purpose of any professional development programming is clearly laid out.
