## **Simon Fraser Student Society Vice President Finance and Executive Committee Response To SFU350 Banking Demands Open Letter**

*Below is the response from Acting VP Finance & Services, Rastko Koprivica in regards to the SFU 350 Open Letter To The Simon Fraser Student Society calling for the Society to divest itself of its relationship with Scotiabank. The demand letter was delivered in person to the office of the VP Finance on March 9th, 2023 and this response was approved by the Executive Committee of the Society on March 10th, 2023.*

Dear SFU350 Leadership and Allies,

The Simon Fraser Student Society (SFSS) Executive Committee hears you loud and clear - you want answers on our use of banking partners in relation to the current climate crisis humanity faces. In my capacity as VP Finance & Services I will outline what the SFSS has done in the past, present, and plans to do in the future in regards to how we bank.

Representing over 26,000 undergraduate students at Simon Fraser University (SFU) we know that we are entrusted with advocating on issues of importance to our membership. One matter of particular importance to students is climate justice. There can be no denial that the choices we make as a society, and the choices corporations, governments, and non-profit bodies such as ours can greatly affect the course of the climate crisis and its effect on people, especially those experiencing marginalization.

In 2021, the SFSS Membership voted to [entrench the fossil-fuel free investment practice that the Society has maintained since 2019 at that year's Annual General Meeting \(AGM\)](#). This resolution from the AGM is present today in the form of [Society By-Law 25 "SFSS Investment Restrictions"](#) which stipulates that "All direct investments made by the Society shall be fossil fuel free, which includes oil, gas and coal producers, pipeline companies, natural gas distribution utilities, and liquefied natural gas operations." and "All Indirect investment is limited to equities whose company only derives at most 5% of their gross revenue from fossil fuel investments". To that end, in response to your third demand to reinvest in a better future we have maintained investment accounts with Vancity Community Investment Bank since at least 2019 where all our investments have been carbon-free and ESG (environmental, social, and governance) compliant. ESG investments are investments that screen for [corporate impact to the environment and society at large](#). The methodology (ESG screening framework) that our investment provider, Vancity Community Investment Bank uses is one that goes beyond just environmental impact but social impact of investments such as socioeconomic equity, racial justice, and public health. [The managed investment funds we hold at Vancity do not invest in fossil fuels, pornography, gambling, military weapons, nuclear power, and the tobacco industries](#). The bulk of our set-aside cash at the SFSS is

---

in investments and savings accounts at Vancity already, the investment account on its own is almost worth \$5 Million. I have shown your representative the equities we have invested in that account - everything from renewable energy technology firms to affordable housing projects, and will be looking at ways to make our investment holdings public to all of our membership to see, it's their money (from student activity fees) after all being invested, and they deserve to know how that money is working in investment holdings.

While all of our savings and investments are at Vancity, it is true that we currently heavily rely on Scotiabank, and it is also true that we used to use Vancity a number of years ago for all of our banking - not just investments. This was something that I flagged early in my role as interim VP Finance back in December to our staff as to why we were using Scotiabank versus using Vancity entirely and I traced the decision to move our operating accounts to Scotiabank was made around 2016 when financing for the Student Union Building (SUB) was being procured. There were certain liquidity and collateral requirements that required the Society to switch to Scotiabank when taking out a loan for the building, and for simplicity's sake the Board and Management at the time switched to Scotiabank. My concern in December 2022 was just like your group's - we were banking with a company that was not aligned with our by-laws on investment restrictions, and even though we did not store investments with said company, we were indirectly contributing to funding of fossil fuel companies due to [fractional reserve banking](#) which is the basis of how modern day financial institutions work - they lend out money that is entrusted to them and return some of the interest borrowers pay to the original account holder.

I (and so does the Executive Team) wholeheartedly agree with your first demand to research ways to move deposits and investments back to Vancity. Investments as explained two paragraphs up we are already there, but for the operating account (basically like a chequing account just for businesses and organizations) and the Society credit card we have more to do. That is why I will be calling a special meeting of the Finance and Audit Committee (FASC) next week before my term as VP Finance is up to recommend to Council to form a working group with at-large student representation on this matter and your group will be invited. I will also be giving a call to our contacts at Vancity to begin the process of applying for one of their credit cards that [return profits gained from them back into the community](#). Our switchover for operating accounts will take some time however (some preliminary work was being investigated before your demands letter in December of last year by myself and staff) and it is estimated if found feasible would take at least a year to complete due to audits, accounting practices, and the nature of being a multi-million dollar organization that sends hundreds of cheques a month, and pays more than 50+ staff. Switching as much as we can to Vancity is in our best interests as a student-funded non-profit organization that is democratically run because a credit union a co-operative funded by its membership as well, with democratic decision making by its members (account holders). There are many parallels. On a personal level I highly encourage students to look at what their local credit union has to offer - usually higher savings rates, investment to the local economy/small business/affordable housing, better client service, and of course more ethical investments. It is my hope that the recommendation to

form a working group passes at FASC so that when I leave office on the 17th of this month, the work can carry on - and I thank your group's publication of your concerns regarding the SFSS use of fossil-fuel backing financial services.

Finally, in regards to your second demand on demanding investment from Scotiabank, you have the Executive Committees full support. We will communicate to Scotiabank the concerns posed by financing fossil fuel expansion and go from there.
